Quick Installation Guide

10/100Mbps PCI Fast Ethernet Adapter

Model # AFEP100

Package Contents:

- 10/100Mbps PCI Fast Ethernet Adapter
- Quick Installation Guide
- Driver CD

5. Replace the computer's cover and connect the network cable to the newly installed network Adapter. Reconnect the computer's power cord and plug it into the power outlet.

Step 2 Driver Installation

Usually for Windows XP or above, the adapter's driver is already included with the OS, and after you install the network adapter, your system will automatically install the driver for you.

For other operating systems, before you connect the PCI Fast Ethernet Adapter to the network, you have to install the adapter's driver first. The driver for each operating system is under a separate folder of the provided compact disk along, and it also includes the detailed installation instructions in the HELP folder.

Note: If the driver for your operating system is not included in the provided CD, please go to <http://www.realtek.com/downloads/> to download the RTL8139D PCI series driver for your operating system.

Section 1

Installation

Thanks for your purchase of Airlink101® PCI Fast Ethernet Adapter. The Installation of the 10/100Mbps PCI bus Fast Ethernet Adapter requires Hardware installation first, then BIOS and Software installation.

Step 1 Hardware Installation

1. Switch off the computer, unplug the power cord, and remove the computer's cover.
2. Select an unused PCI slot and remove its protective bracket.
3. Carefully insert the Adapter and press until all the edge connectors are firmly seated inside the slot. Then, screw the Adapter's bracket securely into the PC's chassis.
4. Install the bracket screw, which secures the Adapter to the computer's chassis.
